

PANEL ON PARTNERSHIPS AND MULTISTAKEHOLDER APPROACHES FOR IMPACT

ORGANISED IN THE CONTEXT OF THE EU-AFRICA RESEARCH AND INNOVATION PARTNERSHIP ON FOOD AND NUTRITION SECURITY & SUSTAINABLE AGRICULTURE [FNSSA]

3 June 2021, 11:00 -13:00 CET

CONTEXT

As a private sector association operating in Africa and beyond, COLEACP is actively engaged in promoting sustainable partnerships with European and African institutions working on research and innovation. We recognise that effective engagement between research, policy and the private sector are of paramount importance to ensure well targeted and appropriate research efforts, and to maximise adoption and impact.

COLEACP is working in several multistakeholder partnerships for research and innovation towards sustainable agriculture and food systems, and enhanced food and nutrition security. The Association and its members actively support the EU-Africa Research and Innovation Partnership on Food and Nutrition Security & Sustainable Agriculture (FNSSA) as an important opportunity to foster collaboration and joint working.

In the context of the Long-term Europe-Africa Research and Innovation Partnership for Food and Nutrition Security and Sustainable Agriculture (LEAP4FNSSA) engagement week, COLEACP, as a private sector association, is taking the opportunity to share some examples of multistakeholder adaptive research projects that demonstrate how synergies and collaboration between diverse actors can generate innovative solutions.

The session will showcase partnerships between research, policy, private sector and other stakeholders to support sustainable value chains (from farm to fork), addressing production, food waste, skills enhancement, and digital tools.

Speakers represent the policy, research, business and farming communities.

PROGRAMME

11h00-11h15	Welcome and Introduction
11h15-11h30	Brokering research and innovation through multistakeholder partnerships
